

# What is the difference between ibaPDA-PLC-Xplorer and ibaPDA-V6?

	ibaPDA-PLC-Xplorer	ibaPDA-V6
max. number of signals	64	64 / 256 / 1024 / 2048
Interfaces included	Xplorer interfaces available at the time of purchase, OPC DA	OPC DA
Hardware interface support	Only specific CPs / adapters approved for S7-Xplorer	yes
Combination with ibaHD-Server / ibaCapture	ibaCapture-V4 only	yes
Extensible with interfaces, upgrades and add-ons	-	yes

You can convert (with costs) an existing ibaPDA-PLC-Xplorer license to a standard ibaPDA license including the Xplorer interfaces already present before the conversion. For this you need the product "Upgrade-PLC-Xplorer to PDA-V6-64" (order number 30.001931).

The only other available upgrade for an ibaPDA-PLC-Xplorer license is "Upgrade-ibaPDA-PLC-Xplorer", order number 30.001900. This upgrade enables all Xplorer interfaces that were not available at the time of purchase but have been released by iba since.

Here's an overview of the possibilities you have with ibaPDA-PLC-Xplorer:

- ibaPDA-PLC-Xplorer is only upgradeable to ibaPDA-V6-64
- No other upgrades are possible except for Upgrade-ibaPDA-PLC-Xplorer to get all newly added Xplorer interfaces („license refresh“)
